

Subject: Aptus Plant Tech – Update to Our 5L Canister Packaging

Dear Partner,

At Aptus Plant Tech, we continuously work to improve the quality, efficiency, and sustainability of our products. As part of this ongoing effort, we are introducing a redesigned 5-liter canister across our product range.

Below you can see a comparison between the new design (left side) and the previous model (right side):

What's new?

- **Improved Handling:**
The new cans offer enhanced ergonomics, making them easier to lift, carry, and pour.
- **Better Stackability:**
The updated structure improves stability during storage and transport.
- **Reduced Packaging Waste:**
The new format reduces unused air inside boxes, optimizing logistics and decreasing environmental impact.

This change reflects our commitment to delivering better usability and more sustainable solutions to our customers worldwide.

If you have any questions regarding this upgrade, feel free to reach out.

Kind regards,
Aptus Plant Tech
